Supplementary Fig. S1  Funnel plot of the logarithm of effect size (hazard ratio) for postoperative incidence of stroke versus the standard error for each study.
Supplementary Fig. S2  Funnel plot of the logarithm of effect size (hazard ratio) for postoperative mortality versus the standard error for each study.
Supplementary Fig. S3  Funnel plot of the logarithm of effect size (hazard ratio) for postoperative incidence of temporary neurological dysfunction versus the standard error for each study.
Supplementary Fig. S4  One-leave-out meta-analysis of postoperative incidence of stroke. DHCA, deep hypothermic circulatory arrest; Sig., significance.
Supplementary Fig. S5  Pooled analysis of 13 studies reporting postoperative incidence of stroke itself.  ACP, antegrade cerebral perfusion; CI, confidence interval; DHCA, deep hypothermic circulatory arrest; IV, inverse variance; RCP, retrograde cerebral perfusion.
