

ERRATUM

Elnaggar MN, Jbeili K, Nik-Hussein, N et al. Amiodarone-Induced Thyroid Dysfunction: a Clinical Update. *Exp Clin Endocrinol Diabetes* 2018; 126: 333–341

In the above mentioned article was a mistake in two sentences. Correct is: A matched cohort study in patients with AIT-2 comparing the efficacy of glucocorticoids against thionamides showed that **at 40 days of treatment 23.8±9.3% remained thyrotoxic in the former group compared to 85.7±7.6% in the latter group** [45].

Therefore, **Thionamides** may be considered as “having no role” in this subtype of AIT [14, 44, 45].
