**Lipid Profiles in Lyme Borreliosis: A Potential Role for Apheresis?**

In the above-mentioned article, the representation of the graphs in Fig. 1, 2 and 3 and the matching captions were incorrect. The correct illustrations with the correct captions are below.

▶ Fig. 1 Lipid profiles in patients with Lyme disease before and after extracorporeal double membrane filtration (INUSpheresis®) (n = 519, ***p < 0.001).

▶ Fig. 2 Lipoprotein associated phospholipase A2 (LP-PLA2) activity in patients with Lyme disease before and after apheresis (**p < 0.001).

▶ Fig. 3 sCRP levels in patients with Lyme disease before and after apheresis (**p < 0.001).
