

Addendum

Synthesis of Halogenated Carboxylic Acids and Amino Acids

Constantin Czekelius,* Carl Christoph Tzschucke* *Synthesis* **2010**, 543.

Inadvertently, we failed to include the contribution of Rios, Moyano et al. on the organocatalytic conjugate addition of fluorobis(phenylsulfonyl) methane and fluoromalonate to unsaturated aldehydes^{1,2} and only cited an independent subsequent publication by Cordova et al.³ We are very grateful to Dr. Ramon Rios for bringing this omission to our attention and would like to apologize for this unintentional oversight.
