APAMI
Asia Pacific Association for Medical Informatics

1 Membership of APAMI
APAMI’s currently active member societies include Australia (HISA), China (CIMA), Hong Kong SAR (HKSMI), India (IAMI), Japan (JAMI), Korea (KOSMI), New Zealand (HINZ), Philippines (PMIS), Sri Lanka (HISSL), Singapore (AMBIS), Taiwan (TAMI) and Thailand (TMIA). There are observer members from Bangladesh, Indonesia, Malaysia, and Nepal. Though Kazakhstan, Pakistan, and Vietnam were members as per past reports, we have been unable to elicit any updates from them.

2 APAMI 2016 Conference
The “9th Asia Pacific Association of Medical Informatics 2016” was held at The-K Hotel Seoul from November 2 until November 5, 2016. The organizing committee consisted of Hasuk Bae (Organizing Secretary), Jae-Ho Lee (Organizing Secretary), Kyung-Hee Cho, Ju-Han Kim (Organizing Chairman), Inyoung Choi (Scientific Program), Hyoun-Joong Kong, Seol-Kyung Baek, Younghee Lee, Young Ah Kim, Soo-Yong Shin, Il Kon Kim, Hyeoun-Ae Park, Jinwook Choi, and Hun Sung Kim.

The conference was attended by 371 delegates from 15 countries coming from different spheres of Healthcare and Medical Informatics. Amongst some of the eminent speakers and delegates for the above conference were Fernando Martin-Sanchez, PhD FACHI and Dr Seong K. Mun (President, Open Source EHR Alliance) from the USA as well as Dr Yu-Chuan (Jack) Li FACHI from Taiwan.

104 Papers was received and 100 were accepted. The presentations were divided into oral & poster sessions. The oral session consisted of different scientific sessions grouped in ten topics; telemedicine for global health network, big data informatics, health data exchange, nursing informatics, Personal Health Record (PHR) and hospital system, Clinical Decision Support System, Electronic Health Record (EHR), mHealth for connected patient care, public health & national health strategy, and mobile health applications.

The conference received good support in the form of sponsorships from various government agencies and IT/healthcare companies. The total amount of registration fee and financial sponsorship was USD 151,448 USD.

3 General Assembly Meeting of APAMI
The APAMI General Assembly meeting for 2016 was held at in conjunction with the APAMI 2016 Conference in Seoul, South Korea, on 4th November 2016 in the Haegeum Hall of the K-Hotel, Seoul, South Korea. The meeting was attended by a record 13 member organizations.

Some highlights of the APAMI GM include:

a. APAMI congratulates the Korean Society of Medical Informatics (KOSMI) for holding a high-quality and financially successful conference.

b. APAMI also congratulates the five winners of the APAMI 2016 Conference Bursary:

Md. Mohaimenul Islam - Bangladesh Institute: Graduate Institute of Biomedical Informatics at Taipei Medical University
Title of accepted Paper: Association of Lipid Profile & HbA1c among T2DM patients: A cross-sectional Study in Bangladesh
Yisi Liu - China
Institution: Capital Medical University, Beijing
Title of accepted Paper: Improving Patients’ Medication Adherence and Lipid Level by Customized Short Message: a six-month Clinical Trial

Sushil Oommen John - India
Institution: The George Institute for Global Health India
Title of accepted Paper: Remote Monitoring in Home Peritoneal Dialysis: Seamless User-centered Proactive Provision of Risk-stratified Treatment in Peritoneal Dialysis

Aneesh Bhattarai - Nepal
Institution: B.P. Koirala Institute of Health Sciences
Title of accepted Paper: Telemedicine Setup and Consultation Process in a Remote Health Post in Eastern Nepal - a cross-sectional Study

Pamod Amorkaran - Sri Lanka
Institution: Health Informatics Society of Sri Lanka
Title of accepted Paper: Disruptive Innovation in mHealth: A Case of Nutrition Monitoring from a LMIC

The Agency’s focus will be on expanding Australia’s “My Health Record” national EHR system to be accessible on mobile devices and provide APIs to allow patients and health professionals to access their record anywhere at any time. Currently, only 16.5% of the Australian population has a national electronic health record.

China
Lieping Wu - China Medical Informatics Association (CMIA)
2016 has been a busy and exciting year for CMIA. We organized and hosted the 14th National Congress on Health and Medical Informatics (CMIA2016), Xiamen, China in September of the year. The conference was successful with over 700 attendees. The conference covered a range of topics in parallel forums, from medical informatics, mobile and tele-medicine, hospital information systems and integration, electronic medical record (EMR) and electronic health record (EHR), information processing and systems for Chinese medicine, cloud computing in management, digital hospital design, Health IT standards and interoperability, health information workforce challenges, and more. HISA also held a “Hacking Health” event that allowed students and young professionals to pitch and develop digital health start-up products. Awards honoring the Australian e-Health pioneer Branko Cesnik were given to the best general and student papers. The scientific program was managed by the Australasian College of Health Informatics (ACHI). ACHI has also published the first comprehensive directory of education programs for the Health Information Professionals in Australia and New Zealand. The College had identified that many state, territories, and federal health authorities and health industry employers are unaware of the education options in the Health Information profession. The directory lists vocational, undergraduate, and postgraduate education and training programs; ACHI hopes this will encourage more Health Information professionals on the journey from entry-level to advanced and formal qualifications.

The next APAMI biennial conference is scheduled to be held in 2018; the tendering process will close 31 Jan 2017.

4 APAMI Executive
The APAMI leadership consists of:
President: Dr KH Cho (Korea)
Immediate Past President: Dr SB Gogia (India)
Past President: Dr Ying Wu (China)
Secretary: A/Prof Klaus Veil (Australia)
Treasurer: Dr CP Wong (Hong Kong)

APAMI communicates with its stakeholders and community of interest through the News@APAMI.org e-mail list, which currently has more than 340 organizations and individuals, as well as our twitter news feed at www.twitter.com/APAMInews.

Please find the reports from the APAMI member countries below.

Australia
A/Prof Klaus Veil - Immediate Past President, Australasian College of Health Informatics (ACHI) & HISA
On 1 July 2016 the Australian Digital Health Agency (ADHA) replaced the National e-Health Transition Authority (NEHTA) to provide direction in developing digital health, bringing the Australian health system into the digital century. Former NHS England director of information Tim Kelsey has been appointed CEO of the Agency.
healthcare, nursing informatics, medical big data application, and medical imaging, and more. The conference promoted nation-wide the use of new technologies in medical practice and pushing for healthcare reforms with the themes of merging new technologies, exploiting big medical data, and discussing new medical reforms.

CMIA also worked hard to promote MedInfo2017. The delegations of CMIA were sent to APAMI2016, CJK2016, New Zealand, Australia, etc. to promote MedInfo2017 as well as scholarly activities. For example, the trip to APAMI2016 in Seoul, Korea, was very successful with the help of APAMI organizers. We are glad to see that the paper submissions to MedInfo2017 surpassed 600 with the Asia-Pacific region as the top contributor.

In APAMI2016 trip, CMIA delegates also attended the APAMI general assembly meeting to jointly discuss APAMI affairs along with the delegates from other member countries.

**Hong Kong**

_C P Wong - Hong Kong Society of Medical Informatics (HKSMI)_

In 2016 Hong Kong has made a major advancement by officially launching the Territory-wide Electronic Health Record Sharing System on 13 March 2017, linking the 40 public hospitals, 160 public clinics to the 12 private hospitals and more than 2,000 private institutions and private practitioners in Hong Kong. This system is the result of the five years hard work of preparation in all the essentials of standardized terminology and a robust legal framework. Tremendous training and lobbying efforts were spent to make this roll out smooth and successful. By the end of the year, more than 400 thousand persons opted-in to enroll into the system for the sharing, and practically all the private institutions have been on the bandwagon. The work left to be done is to engage the private solo clinics and to upload their data. The work left to be done is to engage

Work has already been started to the second phase of the Electronic Health Record Sharing Platform that will include images sharing and patient portals.

**India**

_Oomen John - President, Indian Association for Medical Informatics (IAMI)_

The Ministry of Health and Family Welfare officially released a revised National EHR Interoperability Standards for India in December 2016, after the initial release in 2013. Several members of IAMI have played a key role in the conceptualization, drafting, and policy advocacy for these standards, which is now officially launched. This endeavor has set the pathway for the ambitious Integrated Health Information Platform (IHIP), which would serve as a national health information exchange. IAMI members are playing a strategic role in the consultations that are underway towards developing the roadmap for IHIP. India is also working towards a NDHA (National Digital Health Authority of India), which will provide the policy and legal framework for digital health in India. The current Centre for Health Informatics, National Health Portal (CHI-NHP) will evolve into a National Health Informatics Institute towards capacity building in health informatics. The work left to be done is to engage the private solo clinics and to upload their data. By the end of the year, more than 400 thousand persons opted-in to enroll into the system for the sharing, and practically all the private institutions have been on the bandwagon. The work left to be done is to engage the private solo clinics and to upload their data. The work left to be done is to engage the private solo clinics and to upload their data. By the end of the year, more than 400 thousand persons opted-in to enroll into the system for the sharing, and practically all the private institutions have been on the bandwagon. The work left to be done is to engage the private solo clinics and to upload their data. The work left to be done is to engage the private solo clinics and to upload their data. The work left to be done is to engage the private solo clinics and to upload their data. The work left to be done is to engage

In December 2016, the Second Revision of EHR standards (first released in October 2013) was released by the Ministry of Health. IAMI held its first ever Connectathon at St Johns Research Institute, Bangalore. Manick Rajendran, Sathish Ratakonda, Anirudha Nene, Shashi Bhushan Gogia, and Thanga Prabhu formed the core organizing team from IAMI. Over 20 Healthcare IT/EMR and imaging modalities vendors participated in the two days long event. The contest was provided clinical scenarios and challenged to create clinical records to demonstrate interoperability capabilities across modalities, such as imaging. Over 100 enthusiastic participants were able to witness ‘interoperability in real life’ for the first time, which opened avenues for further collaborations and partnerships. The report of the Connectathon was shared with the key stakeholders to increase its awareness in the healthcare ecosystem, and reinforce interoperability as the ubiquitous foundation for any meaningful usage of data.

IAMI members have been assisting the government in its various informatics efforts. IAMI has been en-gaged in providing thought leadership at different forums across the country and internationally, prominent amongst these have been Healthcare Leaders Forum, Transforming Healthcare with IT, and Health Informatics Summit. IAMI was well represented at APAMI 2016 with several original research papers in the various thematic tracks. Ambient and exciting discussions - which had been continuing in IAMI’s various email forums, such as iami_gen@googlegroups.com and medinfo-india@yahoogroups.com - have now been shifted to an exclusive members-only forum. However, an APAMI wide group has been opened news@apami.org. Membership to the APAMI group is open to all across the globe.

IAMI members are currently engaged in preparing a policy paper for the introduction of health informatics in medical and nursing education through experiential learning. A draft paper has been prepared by active IAMI members along with contributions from mainstream academicians. A consultation meeting is scheduled at New Delhi in early January involving stakeholders from the Government, Healthcare Enterprises, and Regulatory Agencies. The proceedings of the meeting would be tabled to the Ministry of Health for their further consideration.
A new specialty of medicine, Japan board of public health and social medicine was established in December 2016. The board is consisting of the society of epidemiology, public health, occupational medicine, health administration, medical informatics, and others. The board will accept new fellows in spring of 2017.

New Zealand
Inga Hunter - Healthcare Informatics New Zealand (HiNZ)

In New Zealand, we are experiencing sustained and significant growth year on year. In 2016, our two-hour free ‘Primer’ sessions for clinicians attracted record attendances of 40-60 clinicians (up from 5-10 people two years earlier). We believe this growth is being driven by a growing recognition of the importance of health IT in the clinical environment.

Healthcare Informatics New Zealand (HiNZ) as an organization is taking action to reduce fragmentation within the sector by forming proactive collaborations with other NGOs in the clinical and technology space and, in some cases, conducting joint events for members.

In November 2016, in recognition of the constraints of busy professionals with limited CPD funding, we co-located our two local conferences (HiNZ & the Nursing Informatics Conference) with two international tele-health events, to deliver four concurrent conferences in one week in Auckland, New Zealand. Delegates registered once and were able to attend any session across the four conferences. We kept registration fees affordable (only NZ$898 per person). We delivered over 10,000 sessions, and 85% of attendees registered for all four conferences. HI NZ attendance was 1,100 delegates, from 20 countries, including 260 speakers. We also had a 200% rise in author submissions to the HiNZ conference compared to last year and exhibition bookings were 30% up on the previous year, representing a significant investment from local health IT industry.

Most of the growth in the submissions and registrations for the conference came from clinicians. It appears that the NZ market is moving from an ‘early adopter’ to an ‘early majority’ mindset, in regards to the awareness of, and engagement with, health IT by clinicians.

Philippines
Dr Alvin Marcelo - Philippine Medical Informatics Society (PMIS)

The Philippine Medical Informatics Society (PMIS) has expanded to more than 1,200 members and continues to nurture the society through social media - www.facebook.com/groups/philmedinfo. Several PMIS members provide civil society and professional representation to the National eHealth Governance Structure - the formal organizational process to develop a comprehensive eHealth program in the country. The National eHealth Program is led by the Steering Committee chaired by the Secretary of Health and comprises the Secretaries of Science and Technology, Information and Communications Technology, the President of PhilHealth, and the Chancellor of the University of the Philippines Manila. The Steering Committee evaluates stakeholder needs, sets directions, and monitors the progress of the national eHealth program.

PMIS members have been officially appointed to the following committees and working groups of the National eHealth Program:

- The Technical Working Group (an analog of the IT Strategy Committee as per the WHO-ITU National eHealth Strategy Toolkit). The TWG meets monthly and aligns, plans, and organizes the activities of the major stakeholder agencies along the directions set by the Steering Committee.
- The Standards Expert Group (SEG) was directed to create and maintain a catalog of standards for use by health information systems. The SEG extended their work with the production of the Standards Change Management Manual.
- The Privacy Expert Group (PEG) was directed to ensure that all eHealth systems in the country obtain proper guidance on how to comply with the Data Privacy Act of 2012.
- The Advisers Group represents the private sector and ranges representation from hospitals, ICT companies, and health professional organizations.
- The Electronic Medical Records Expert
Group (EMREG) comprises implementers of solutions in government frontline clinics.

- The Health Enterprise Architecture Expert Group (HEAEG) maintains the enterprise architecture for health sector in the country.
- The Risk Management Expert Group keeps track of business risks of the National eHealth Program.

A National eHealth Summit is being planned to be convened by the Secretary of Health with the assistance of the PMIS.

On the international side, PMIS founding chair is connected to the other APAMI members Drs. Boonchai Kijanyotin (Thailand), Dr Anis Fuad (Indonesia,) and Mr. Jai Ganesh (India) and established the Asia eHealth Information Network (www.aehin.org) with support from the World Health Organization, Asian Development Bank, UNICEF, NO-RAD, and other development partners. The goal of AehIN is to specifically support the national eHealth strategies of ministries of health in Asia. The 5th AehIN General Meeting will be co-hosted by the Ministry of Health and Sports Myanmar in Naypyitaw, March 6 to 10, 2017. An invitation has been extended to the president of APAMI to participate.

**Singapore**

*Adam Chee - Association for Medical & Bioinformatics Singapore (AMBIS)*

AMBIS recovered from a three-year “hiatus” with a new Executive Committee elected on the 25 April 2016, comprising:

- President: Dr. Adam Chee - BinaryHealthCare (BNHC)
- Vice-President: Dr. Lam Tze Hau - Agency for Science, Technology and Research (A*STAR)
- Secretary: Dr. Kenneth Ban - National University of Singapore (NUS)
- Treasurer: Dr. Hu Yong Li - Agency for Science, Technology and Research (A*STAR)
- Ordinary Committee Member: Mr. Gab Sim - The Healthcare Board (THCB)
- Ordinary Committee Member: Michael Xue Ming - Khoo Teck Puat Hospital (KTPH), Singapore

The following (key) activities were held in 2016:

- HL7 Singapore - AMBIS Joint Summit 2016, 19 August 2016, Singapore
- 15th International Conference on Bioinformatics (InCOB 2016), 21 - 23 September 2016, Singapore

AMBIS is the process of re-engaging the local stakeholders in the area of Health Informatics and also work-ing with HL7 Singapore to setup the National IHE Chapter for Singapore (housed under HL7 Singapore).

**South Korea**

*In Young Choi - Korean Society of Medical Informatics (KOSMI)*

As of January 13, 2017, KOSMI has more than 6,000 different types of members consisting of 223 life-time members, 130 full members, 43 student members, 5,669 Web members, and 12 institute members.

The Ministry of Health and Welfare of the Republic of Korea is continuously conducting a clinical information exchange pilot project. In 2016, patient care information from two large hospital groups was exchanged between the international terminology standard and the HL7 CDA standard. In 2017, the pilot business continues to expand through the exchange of medical information from six large hospital groups.

KOSMI plays a very important role in the field of biomedical informatics in Korea by providing opportunities for sharing and exchanging information and knowledge in the field. Main activities of the KOSMI include hosting regular biannual academic conferences, seminars on different topics, and publishing the Health Informatics Research (HIR), an official journal of KOSMI four times per year.

The spring conference was held at College of Medicine, Ajou University in Seoul from June 23 to June 24. The theme of the conference was “Future of Health Changed by Artificial Intelligence” and 334 members participated in the conference. There were three tutorials, 10 symposiums, 20 paper presentations, and 36 poster presentations. Three papers and one poster were awarded and recognized as the best papers and poster respectively at the conference.

KOSMI published the 22nd volume of the HIR in 2016. The KOSMI currently publishes two issues completely in English. In general, each issue publishes one review article, 6-10 original research articles, a case report, and two book reviews. The Journal was accredited by the Korea Research Foundation in 2006 and registered as one of the prestigious academic journals in Korea.

KOSMI organized “9th Asia Pacific Association of Medical Informatics 2016” at The K Hotel Seoul, Seoul on 02nd – 05th Nov 2016 and the chairman of the organizing committee were Kyung-Hee Cho and Ju-Han Kim. The organizing committee consisting of Hansuk Bae (Organizing Secretary), Jae-Ho Lee (Organizing Secretary), In Young Choi (Scientific Program), Hyoun-Joong Kong, Seol-Kyung Baek, Younghee Lee, Young Ah Kim, Soo-Yong Shin, Il Kon Kim, Hyeouen-Ae Park, Jinwook Choi, and Hün Sung Kim (Organizing Committees). The committee worked hard and toiled to make the conference a grand success. The conference was attended by 371 delegates from 15 countries coming from different spheres of Healthcare and Medical Informatics. Amongst some of the eminent speakers and delegates for the above conference were Fernando Martin-Sanchez PhD from USA, Dr Yu-Chuan (Jack) Li from Taiwan, and Dr Seong K. Mun from USA. A total of 104 Papers were received and 100 were accepted.

**Sri Lanka**

*Prof Vajira Dissanayake - President, Health Informatics Society of Sri Lanka (HISSL)*

The HISSL board was reconstituted in February 2016 and now it is comprised of:

- President: Prof Vajira H. W. Dissanayake MBBS, PhD, FNASSL
- President Elect: Dr Rohana Marasinghe MBBS, PhD
- Secretary: Dr Achala Jayatilleke MBBS, MSc (Biomedical Informatics), PhD
- Assistant Secretary: Dr Chaminda Weerabaddana MBBS, MSc (Biomedical Informatics)
- Treasurer: Dr. Pandula Siribaddana MBBS
- Assistant Treasurer: Dr. Premil Liyanage MBBS, MSc (Biomedical Informatics)
- Executive Vice Presidents: Dr. Prasad Ranatunga MBBS, MSc (Biomedical Informatics) (Conference and Events); Dr. Rikaz Sheriff MBBS, MSc (Biomedical Informatics) (Continuos Professional Development); Dr. Clive James MD, MSc...
The major activity for HISSL during the second half of the year 2016 included organizing and con-ducting the Commonwealth Medical Associations 24th Triennial Conference 2016 on the theme Digital Health for Health and Wellbeing (http://www.cma2016.org). The conference was a grand success. The HISSL is now partnering with the Commonwealth Medical Association as its main partner to establish a Commonwealth Digital Health Network and a Commonwealth Institute of Digital Health.

HISSL flagship project initiated in 2016, the District Nutrition Monitoring System (DNMS), has now been successfully implemented in three districts. It is now been scale up to other parts of the country. The mobile app of the DNMS won the award for the best early stage app at the mBillianth funded by the Ministry of Public Health (MOPH) to implement the framework and guideline in 34 public and private hospitals. TAMI also launched its official journal this year: The Journal of Medical Informatics Competency Exams and we have the first Full-score candidate. In addition, TAMI founded the Taiwan Association of Medical Informatics Foundation and moved to own offices.

For more information, please contact APAMI Secretary A/Prof Klaus Veil at Secretary@APAMI.org

**Thailand**

Dr. Boonchaty Kijsanayotin - Vice President, Thai Medical Informatics Association (TMI)

The Thai Medical Informatics Association (TMI) has played a crucial role in the field of biomedical and health informatics in Thailand by working with both local and international health communities and industries to increase sharing and exchanging news, information, and knowledge in the field. As of July 2016, TMI has 544 registered members and around 50% are health care professionals.

Regular activities of the TMI include hosting biannual academic conferences, a mid-year healthcare CIO and annual national health IT conference. Several Health IT/eHealth seminars/workshops on different topics such as health data analytics workshops and introduction to health IT/eHealth seminars have been provided to members and general public. In 2017, our mid-year Healthcare CIO forum was held with the HIMSS Asia Pac 2016 Conference in Bangkok on 24-25 August 2016. There were 113 CIO-level participants attending our midyear CIO forum. TMI's 2016 annual and national health IT conference was successfully held in Bangkok on 23rd-25th November 2016; 312 Health IT professional attended the conference. The theme of the conference was “Health Information Exchange for Better Healthcare”.

TMI has published the Health IT Quality Improvement Framework (HITQIF) including the hospital IT improvement guideline and has worked together with the Ministry of Public Health (MOPH) to implement the framework and guideline in 34 public and private hospitals. TMI also launched its official journal this year: The Journal of the Thai Medical Informatics Association (JTMI), the official journal of the Thai Medical Informatics Association (TMI), publishes biannually peer-reviewed original articles in English and Thai. TMI also communicates with members and public through TMI Newsletter, which publishes every 3 months, mailing list and social media.

Together with representatives from the Philippine Medical Informatics Society (Philippines), HISSL (Sri Lanka), FIKI (Indonesia), TMI and MOPH health-IT leaders were able to undergo training on IT Governance (COBIT5 Foundation and Implementation) with support from WHO, AoHIN (Asia eHealth Information Network), and NORAD.

For more information, please contact APAMI Secretary A/Prof Klaus Veil at Secretary@APAMI.org
