Breaking up Prolonged Sitting does not Alter Postprandial Glycemia in Young, Normal-Weight Men and Women

Published online: October 7, 2016.
DOI: 10.1055/s-0042-113466

In the abstract it reads: Peak blood glucose (p=0.55) and iAUC (CON: 252 mmol · L⁻¹ · 2.5 h⁻¹ [163–340]; LIPA: 214 mmol · L⁻¹ · 2.5 h⁻¹ [146–282]; p = 0.45) were not different between trials.

However, it should read: Peak blood glucose (p=0.55) and iAUC (CON: 25.2 mmol · L⁻¹ · 2.5 h⁻¹ [16.3–34.0]; LIPA: 21.4 mmol · L⁻¹ · 2.5 h⁻¹ [14.6–28.2]; p = 0.45) were not different between trials.
