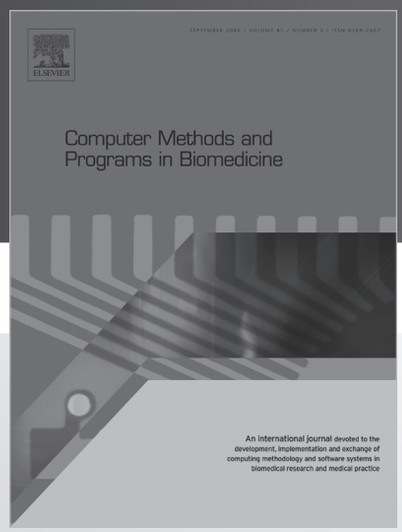
Computer Methods and Programs in Biomedicine



Editor-in-Chief: T. Groth, Sweden
Asia Pacific Associate Editor: J. Li, Taiwan
European Associate Editor: M. van Gils, Finland

An international journal devoted to the development, implementation and exchange of computing methodology and software systems in biomedical research and medical practice.

The journal covers computing methodology and software systems derived from computing science for implementation in all aspects of biomedical research and medical practice.

The journal's aims are:

- to encourage the development of formal computing methods, and their application in biomedical research and medical practice
- to stimulate basic research into application software design
- to report the state of research of biomedical information processing projects
- to report new computer methodologies applied in biomedical areas
- to provide a forum for discussion and improvement of existing software

Articles in Press – your paper can be online in as little as 6 weeks

- Average monthly article downloads on ScienceDirect for this journal: 9,459*
- **Online submission and peer review** leading to faster publication. Submit your paper today at **http://ees.elsevier.com/cmbp/**

ScienceDirect™
TOP 25 Hottest Articles

The TOP25 Hottest Articles is a free quarterly service from ScienceDirect. Subscribe to the TOP25 and receive an e-mail every three months listing the ScienceDirect users' 25 most frequently downloaded journal articles, from your journal of choice! **http://top25.sciencedirect.com/signup**
