# Computer Methods and Programs in Biomedicine

**Editor-in-Chief:** T. Groth, Sweden  
**Asia Pacific Associate Editor:** J. Li, Taiwan  
**European Associate Editor:** M. van Gils, Finland

An international journal devoted to the development, implementation and exchange of computing methodology and software systems in biomedical research and medical practice.

The journal covers computing methodology and software systems derived from computing science for implementation in all aspects of biomedical research and medical practice.

The journal's aims are:

- to encourage the development of formal computing methods, and their application in biomedical research and medical practice
- to stimulate basic research into application software design
- to report the state of research of biomedical information processing projects
- to report new computer methodologies applied in biomedical areas
- to provide a forum for discussion and improvement of existing software
