

Pyrylium Salts: Selective Reagents for the Activation of Primary Amino Groups in Organic Synthesis

Yue Pang

Daniel Moser

Josep Cornella

Synthesis **2020**, 52, 489.

In the originally uploaded e-first version of this short review, an important reference, 55e, was missing. This reference was added, together with a short paragraph describing the chemistry, to the eighth page of an updated version, published on 15th of October.
