

Editorial

Welcome to Seminars in Thrombosis & Hemostasis 2021—New (2019) Impact Factor and Most Highly Cited Papers

Emmanuel J. Favaloro, PhD, FFSc (RCPA)¹

¹Department of Haematology, Centres for Thrombosis and Haemostasis, Institute of Clinical Pathology and Medical Research (ICPMR), Westmead Hospital, Westmead, New South Wales, Australia

Semin Thromb Hemost 2021;47:1–5.

Welcome to the start of another year with *Seminars in Thrombosis & Hemostasis* (STH), this being my 13th year anniversary as Editor in Chief. As always, I sincerely wish to thank again all the contributors to STH over the years, as well as Guest Editors for past issues, and of course the current and past Editorial team. There has been no major overhaul of the editorial team at the time of writing, although some adjustments will continue to occur over the coming years.

I also take this opportunity to once again thank the journal production team at Thieme Medical Publishers for their high production standards and for facilitating both the print and online issues of the journal.

This Editorial also represents the time that we reflect on our journal's impact factor, which for 2019 was 2.892, and thus it represents a significant decrease from our 2018 impact factor of 3.401. Although somewhat disappointed with this, I would also like to note that a significant decrease in impact factor was seen with most of the journals publishing in the thrombosis and hemostasis field (►Fig. 1). As typical for this yearly editorial, I also assessed the trends for self-citations, and this reflects positively for recent data (►Fig. 2). In any case, the impact factor is only one of the several markers of the journal "quality" that we should consider, and the limitations of any of the individual markers (including the impact factor) as a "quality" indicator, have previously been discussed.^{1,2}

Like I also do annually, now, the highest cited (2017/2018 published) contributions^{3–34} from this journal are also listed in ►Table 1 for the potential interest of the readership and contributing authors. These contributions identify those publications that are mostly contributing to the 2019 impact factor, and each were cited five or more times in the literature in 2019. For those interested, the current listing can be

Fig. 1 More "falls" than "rises" in 2019 impact factors among eight journals publishing in thrombosis and hemostasis.

Fig. 2 Percentage of self-citations for *Seminars in Thrombosis & Hemostasis* in recent years—aiming for less.

Address for correspondence

32	Russo V, Attena E, Mazzone C, et al. Nonvitamin K antagonist oral anticoagulants use in patients with atrial fibrillation and bioprosthetic heart valves/prior surgical valve repair: a multicenter clinical practice experience. <i>Semin Thromb Hemost</i> 2018;44(4):364–369

^aCited five or more times in 2019. Thus, contributing most to the STH 2019 impact factor.

compared with the most recently published top downloaded article listings from *Seminars in Thrombosis & Hemostasis*, the basis of the Eberhard F. Mammen “Most Popular” awards.^{35–39} Accordingly, I would like to thank all the contributors, guest editors, and the editorial team for bringing us the content that makes *Seminars in Thrombosis & Hemostasis*.

Several papers that I will highlight in particular: (a) the paper by the team of Kitchen, Tiefenbacher, and Gosselin³ was not only the most cited paper according to ► **Table 1**, but was also awarded one of the 2019 Most Popular awards³⁷; (b) the highly cited paper by Russo and colleagues¹⁴ was also awarded one of the 2020 Most Popular awards³⁹; (c) the highly cited paper by Schreiber and colleagues¹⁶ was also awarded one of the 2020 Most Popular awards,³⁹ as well as being authored by a recipient of a previous 2016 Young Investigator awardee; (d) the highly cited paper by Lippi and colleagues¹⁸ was also awarded one of the 2020 Most Popular awards³⁹; (e) the highly cited paper by Kell and Pretorius²⁷ was also awarded one of the 2019 Most Popular awards.³⁷

Several issues of the journal are also worthy to be highlighted as most of them contributed to the 2019 impact factor. The seven most highly contributing issues,^{40–46} both in terms of total and average impact factor contributions, were:

1. Fibrinolysis: Biochemistry, Clinical Aspects, and Therapeutic Potential. Guest Editors: Hau Kwaan, Ton Lisman, and Robert Medcalf.⁴⁰
2. Laboratory Assessment of Hemostatic and Anticoagulant Therapy. Guest Editors: Dorothy M. Adcock, and Robert C. Gosselin.⁴¹
3. Recent Advances in Thrombosis and Hemostasis—Part III. Guest Editor: Sam Schulman.⁴²
4. Editorial Compilation V. Guest Editors: Emmanuel J. Favaloro and Giuseppe Lippi.⁴³
5. Point-of-Care Testing in Acute Hemorrhagic and Thrombotic States. Guest Editor: Marcel Levi.⁴⁴
6. Extrahemostatic Functions of Platelets and Coagulation Factors. Guest Editors: Roger Preston and Ton Lisman.⁴⁵
7. Editorial Compilation III. Guest Editors: Emmanuel J. Favaloro and Giuseppe Lippi.⁴⁶

Finally, a short note to confirm that we, like always, will continue to develop plans for the future content of this journal, and we are confident that *Seminars* would continue to bring its readers the high-quality journal that is expected of us. Currently confirmed topics for issues that we plan to publish over the next 12 or so months are listed in ► **Table 2**. At the same time, we recognize the need to retain some

Table 2 Current planned topics for future issues of *Seminars in Thrombosis & Hemostasis* include:

• Editorial compilations (continuing series)
• Recent advances in thrombosis and hemostasis (continuing series).
• Maintaining hemostasis and preventing thrombosis in COVID-19 (continuing series).
• Innovations in thrombosis and hemostasis part II: focus on tests and assays.
• Hemostatic and nonhemostatic effects of heparan sulfate proteoglycans (HSPG).
• Cardiovascular and thromboembolic diseases in oncology: novel aspects and revisited issues.
• Personalized approaches to bleeding and thrombotic disorders.
• Altered fibrinolysis: clinical impact and diagnostic challenges.

Abbreviation: COVID-19, coronavirus disease 2019.

flexibility in our plans, and to potentially add additional material of current interest and controversy as the need arises. Notably, coronavirus disease 2019 (COVID-19) continues to create havoc for all of us, and this pandemic has led us to create a continuing series of issues specifically focused on thrombosis and hemostasis in COVID-19. Irrespective, we look forward to another interesting year of reading in 2021.

Conflict of Interest

None declared.
