

# European Federation of Societies for Ultrasound in Medicine and Biology

## Next EUROSON Congress

Dear Colleagues,

Euroson 2017 Congress is six months ahead and the preliminary programme is on the website <http://www.euroson2017.org>. Abstract submission is already available.

This year, the congress will be running in 5 parallel meeting halls covering a great variety of topics in ultrasound: US-guided interventions, pediatrics, emergency, breast, musculoskeletal will be covered widely and interactively. New guidelines will also be discussed in detail.

Those who are interested in obstetrics or thyroid US will have the chance to participate in full-coverage structured condensed categorical courses. In these courses, ex-

perts will not only present their theoretical knowledge, but will also share their practical experiences with interactive practical demos. Abdominal and gastroenterological US sessions will be plentiful with all tips and tricks about the use of elastography and contrast agents for abdominal organs and the gastrointestinal tract.

Furthermore, medical students will become familiar with the spectrum of sonography. Hands-on training with experts in the Ultrasound Learning Center (ULC) will also be available for all students and of course for all other participants.

Participants can be more active by sending their scientific works in several forms (oral-poster and video-case presentations), to be

presented within the major sessions, if selected. Please, forward abstracts before 21 April.

Beyond the scientific content, a congress is expected to offer an enjoyable social atmosphere. Ljubljana is certainly an excellent city to create this warm environment. We are looking forward to meeting you in Ljubljana, Slovenia Friday 22- Sunday 24 September.

Prof. Dr. Odd Helge Gilja, EFSUMB President

Prof. Dr. Adnan Kabaalioglu, EUROSON Congress 2017 President

Prof. Dr. Mustafa Seçil, Chairman Local Organising Committee
