ERRATUM

The authors have brought a few errors to the publisher’s attention in the above article in the Asian Journal of Neurosurgery (Doi: 10.1055/s-0043-1774395). The value of patients in the Results section in Abstract should read as 53 instead of 43. The correct sentence is as follows:

Fifty-three patients with a median age of 33 (interquartile range, 4–49) years were included.

Additionally, the alignment of text and figures has also been corrected in Table 1 in the article.

ISSN 2248-9614.
