Simple and Efficient Syntheses of $N$-Glyoxyloyl-7,7-dimethylnorbornane-(1′S,2′R)-oxazolidinone and Its Thio Derivative – Useful Chirons for Diastereoselective Reactions

The compound names for structures 2a, 2b, 3, 5 and 6 were misprinted. The correct names are as follows:

N-Crotonoyl-7′,7′-dimethylnorbornane-(1′S,2′R)-oxazolidinone (2a)
N-Crotonoyl-7′,7′-dimethylnorbornane-(1′S,2′R)-oxazolidinethione (2b)
N-Glyoxyloyl-7′,7′-dimethylnorbornane-(1′S,2′R)-oxazolidinone (3)
N-Glyoxyloyl-7′,7′-dimethylnorbornane-(1′S,2′R)-oxazolidinethione Ethyl Acetal (5)
N-Glyoxyloyl-7′,7′-dimethylnorbornane-(1′S,2′R)-oxazolidinethione Ethyl Hemiacetal (6)

In the analytical data for these compounds, $[a]_{20}^{20}$ values were misprinted as $[a]_{0}^{20}$ values, and NMR data were reported as d values instead of the correct δ values.

The editorial office apologizes for these typographical errors.
