

FOREWORD

Traumatic Brain Injury and Its Management

This latest issue of *Seminars in Speech and Language* is in response to a questionnaire sent to readers last year. At that time, readers indicated strongly that they wished to be updated on the treatment of traumatic brain injury (TBI). It is fortuitous that the Academy of Neurologic Communication Disorders and Sciences (ANCDS) was completing its practice guidelines on TBI at that time. *Seminars* was well positioned to publish one of its major compilations concerning clinical management.

This issue represents truly state-of-the-art treatment and assessment research concerning TBI. I thank Lyn S. Turkstra, Ph.D., and the authors she has assembled to complete this issue. All of you recognize the authors as outstanding contributors to our knowledge concerning TBI and its management.

Audrey L. Holland, Ph.D.
*Co-Editor in Chief*¹

Evidence-Based Practice for Cognitive-Communication Disorders after Traumatic Brain Injury; Editors in Chief, Audrey L. Holland, Ph.D., and Nan Bernstein Ratner, Ed.D.; Guest Editor, Lyn S. Turkstra, Ph.D. *Seminars in Speech and Language*, volume 26, number 4, 2005. ¹Department of Speech, Hearing and Language Sciences, University of Arizona, Tucson, Arizona.
