JAAA CEU Program

Volume 28, Number 1 (January 2017)

Questions refer to Korhonen et al, "Evaluation of a Wind Noise Attenuation Algorithm on Subjective Annoyance and Speech-in-Wind Performance," 46–57.

Learner Outcomes:

Readers of this article should be able to:
- Identify the style of hearing aid that experiences the greatest amount of wind noise.
- Explain how least-mean-squares filtering can reduce uncorrelated noise, serving as the basis for hearing aid wind noise attenuation.

1. Wind noise in hearing aids is generated when:
   a. wind passes objects (trees, shrubs, car window) in the listening environment and creates noise
   b. wind generates turbulences at the hearing aid microphone membrane
   c. hearing aids generate internal circuit noise

2. Because of its microphone placement, completely-in-the-canal and in-the-canal devices generally:
   a. experience less wind noise than BTE devices
   b. experience more wind noise than BTE devices
   c. are immune to wind noise

3. Generally, the strongest wind noise level is experienced for wind originating from the:
   a. front
   b. back
   c. side

4. Wind noise attenuation (WNA) algorithms typically use _____ to detect wind noise.
   a. anemometer sensors
   b. quick changes in the input signal
   c. correlation of input signals between front and back microphones

5. The adaptive WNA algorithm in the current study was designed to remove:
   a. uncorrelated noise
   b. correlated noise
   c. both correlated and uncorrelated noise

6. Stimuli were prerecorded in a wind tunnel and presented via insert earphones to allow:
   a. control of wind characteristics across hearing aid processing conditions
   b. post processing with experimental algorithms
   c. presenting the stimuli at more comfortable levels

7. The wind noise levels measured at the output of the hearing aid ranged from:
   a. 81 to 109 dB SPL
   b. 91 to 119 dB SPL
   c. 101 to 129 dB SPL

8. The measured signal-to-noise benefit at 50% performance level when using the WNA algorithm was ___ dB when wind originated from 0° at 5 m/sec.
   a. 2.39
   b. 4.39
   c. 8.39

9. Greatest change in annoyance when using the WNA algorithm was reported at a wind speed of:
   a. 4 m/sec
   b. 6 m/sec
   c. 10 m/sec

10. The phenomenon "apparent wind" refers to:
    a. subjective perception of wind severity
    b. average wind experienced throughout the day
    c. the vector sum of true wind and headwind experienced in still air due to physical movement

JAAA CEU PROGRAM

WHO? All members of the Academy receive the CE Registry as a member benefit and are eligible to participate in the *JAAA* CEU Program.

WHAT? The *JAAA* CEU Program offers a minimum of 1.6 CEUs (16 continuing education hours) per volume year. Individuals can submit one or all *JAAA* CEU assessments for scoring and CEU credit. Each *JAAA* assessment is worth .2 CEUs.

WHERE? *eAudiology.org—Your CEU Source*

Participants can complete the assessments using the eAudiology.org online submission system, which provides automatic feedback (score, correct answers) and automatic recording to the member's CE Registry record.

WHEN? Volume 28 (2017) assessments will be accepted through December 31, 2017. Volume 28 submissions will be accepted by e-mail online at eAudiology.org. Submissions are credited in the calendar year they are submitted.

Volume 27 (2016) assessments will be accepted for a separate registration fee of $95 until December 31, 2017. You can earn up to 1.6 CEUs! To register visit eAudiology.org. Volume 27 (2016) assessments will only be accepted via the online program.

WHY? Because you want convenient and cost-effective CEUs!

HOW? To register online, go to www.eAudiology.org. Once you have registered, the *JAAA* CEU Program will be added to your dashboard, and you will be able to access the assessments from there. If submitting by mail, complete the following and send with your completed answer sheet to the address below.

TIER 1 CREDIT (For ABA certificants)

T1

Tier 1 credit is available in this issue of *JAAA*. In order to receive Tier 1 credit for this assessment, you must score 80% or better. The credits will appear on your Academy transcript as Tier 1.

❒ Please check here if you are seeking Tier 1 credit.
