Letters to the Editor

Re: Non-radiation occupational hazards and health issues faced by radiologists - A cross-sectional study of Indian radiologists’ by Kawthalkar AS et al.

Dear Editor,

I read with interest the article of Jan-Mar issue titled ‘Non-radiation occupational hazards and health issues faced by radiologists – A cross-sectional study of Indian radiologists’ by Kawthalkar AS et al.[1] The article had clearly described the high prevalence of musculoskeletal, ophthalmic problems, issues like burnout, along with unique mental stressors such as PCPNDT-related issues. Atwal et al. also had raised similar issues in the Indian radiologists.[2]

I would like to re-emphasize another more dangerous but under recognised health issue associated with
